Library Data Warehouse - User Guide

1. Introduction

This dashboard replaces manual Excel reporting, providing real-time insights into library usage across physical books, digital resources, and room bookings.

2. Getting Started

1. Open your web browser and navigate to the Streamlit app URL.
2. Use the sidebar to log in with your credentials (Admin, Analyst, or Dept Head).

3. Navigating the Dashboards

- **Overview Tab:** Shows high-level Key Performance Indicators (Total Downloads, Loan Days, Room Hours). It includes line and bar charts showing monthly trends.
- **Departments Tab:** Displays which academic departments use the library the most. (Department Heads will only see their own data here).
- **Peak Times Tab:** A pie chart showing the busiest time slots for room bookings.
- **Explorer Tab:** Use the dropdowns to perform OLAP Drill-Downs. You can select a Year and a Metric to see how usage changes by Quarter and Month.

4. Exporting Data

Scroll down to the "Raw Data" section on any page to view the underlying SQL data. You can hover over the table and click "Download as CSV" to export it for offline use.
